Transmitter

REPLACEMENT OF TRANSMITTER BATTERY

If transmitter becomes unreliable, replace transmitter battery as follows.

- 1) Remove screw (1) and transmitter cover (2).
- 2) Remove transmitter (3) from transmitter holder (4).
- 3) Put edge of coin or flat blade screwdriver in slot of transmitter (3) and pry it open.
- 4) Replace the battery (lithium disc-type CR1616 or equivalent battery) so its + terminal faces "+" mark on transmitter.
- 5) Fit together transmitter (3) and install it into transmitter holder (4).
- 6) Install transmitter cover (2) and screw (1).
- 7) Make sure the door locks can be operated with transmitter.

CAUTION:

Use care not to allow grease or dirt to be attached on the printed circuit board and the battery.

NOTE:

- To prevent theft, be sure to break the transmitter before discarding it.
- Dispose of the used battery properly according to applicable rules or regulations. Do not dispose of lithium batteries with ordinary household trash.
